

# Individual Architecture

aerosun® EXCLUSIVE LINE

 made in Germany

 aeronautec®  
Segel und textile Architektur

# Create More Space

*in the  
open air*

We design exclusive space types - for your outdoor living room.  
Such as a comfortable garden lounge, a pool shading or weather protection  
for your open air kitchen.

If desired, in combination with light, heat and acoustics.

# *Exclusive Style*

*made with love  
in Secon*

# Enjoy Comfort Zones

*with sweet  
dreams*

From the idea to the processing and final assembly, each project is specially designed to your needs.

Whatever your needs, we will help you to find an individual and unique solution, to give you and others more space.

With an exceptional aesthetic claim, aeronautec creates new visual highlights in architecture.

Depending on local conditions and requirements the aerosun® MEMBRANE STRUCTURES can be designed as half or whole year solutions.

# *Experience Architecture*

*in perfect  
aesthetics*

# *The Secret of our Success*

*are excellent  
fabrics*

The secret of our success is called aeroflon®. aeronautec developed this extremely durable membrane made of 100 % PTFE (Polytetrafluorethylen) and patented it.

The multiple award winning fabric is already being used successfully in a wide variety of industrial applications apart from textile architecture.  
For us, it is the material with which we realize your wishes and visions.

# Regional Production

Experience service from one source. After measurement, conception and customization of your aerosun® MEMBRANE STRUCTURE, we are assembling with our own team, because we understand our work as an integral process.

Each sail is accustomed to local conditions and requirements and the size of the shading space. Also the altitude of the sun in different times of the year plays an important role - so you can enjoy your comfort zone in all kinds of weather.
